6-Systems | Enabling Innovative Mobility

6-Systems is a full-service IT provider and domain expert in Car Sharing within Sixt Group. Sixt has existed for over 100 years and as the first globally active mobility service provider, we show what innovative products and excellent service look like every single day. We are more than 6,000 employees across 105 countries.

Our Car Sharing solutions are attracting

- property developers, who want to impress new residents and save parking spaces;
- big cities, as their residents do not need their own cars anymore;
- and vehicle fleet owners, as they want to reduce the costs of their vehicle pools.

To select and use cars the end customers need only an app installed. That simple!

Various business models supported

- users can reserve vehicles in advance or use the cars on-demand;
- employees of corporations can pay for private use of corporate cars;
- city residents can take cars from the streets or parking garages.

Integration with city authorities

- public transport integrations
- automated parking costs payment
- automated administrative offence processing
- various automated reports for city authorities

Apps used to Open and Close cars

- select car and unlock the doors with 3 clicks
- BMW and MINI native integration
- Sixt technologies to support Mercedes, Skoda, Ford, VW, etc.
- Bluetooth ensures stop-over in the underground parking garages

Designed to be profitable

- various features to increase fleet utilization
- dynamic prices and discounts
- various add-on products

Constantly increases the value of the customer as an asset

- automated driver's license, identity and solvency checks
- quick registration with external profiles or with QR codes
- customer churn prediction
- different incentive models and marketing campaigns

Business Intelligence helps to make correct decisions

- supports accounting, sales, marketing and fleet teams
- artificial intelligence prevents fraud and helps identify new products

Proven Technology

- 7.5 years in operation
- used in 9 European countries
- 6000+ cars connected
- 35.000+ rides a day
- electric and conventional vehicles supported

High level of security

- PCI/DSS compliant
- fraud prevention logics
- user rights system supports franchise model

WE ARE OPEN FOR NEW IDEAS AND READY TO CUSTOMIZE OUR CAR SHARING PLATFORM TO SUPPORT YOUR BUSINESS
